The TERRA MINI-JET in the shored working pit during the pilot bore.

View to the starting pit. The HDPE pipes OD 225 mm are laid underneath this road and parking area.

This truck with rear crane was purchased by M/s Gerhard Rode especially for the TERRA MINI-JET.

Pic. left:
The pipe pulling has begun. The 0.5 m long drill rods are pulled into the pit frame and disassembled.

Pic. right:
M/s Gerhard Rode has built their own rod boxes. They allow the cleaning of the drill rods either outside or inside.

Pic. left:
One of the 4 HDPE pipes OD 225 mm is successfully pulled in.
